

Apprentices start at Priors as a young inexperienced teenagers however Michael, butchery tutor and the rest of the Poultec team have not only given them some valuable practical skills but also helped them with the knowledge and confidence around the trade. We've had three Apprentices that we have successfully put through Poultec Training's Butchery Apprenticeship scheme and it certainly won't be the last...

Andrew, Owner

Butchers - Priors Of West Lynn

The Apprenticeship scheme is well-established across our Trust, we believe that well-trained staff deliver better, safer patient care. Apprenticeships have enabled us to educate, develop and support our staff in order to retain and plan succession as well as fill roles that are hard to recruit. Through the use of Apprenticeships we have been able to adopt a "Grow our Own" approach to develop the Workforce for the future.

We have worked with Poultec for many years, the equine Apprenticeship has helped me develop a fantastic fully trained team to a high standard. We found that developing young, up and coming individuals is a great way to mould them into doing a great job.

Poultec offered both us and the learners lots of support throughout the process. I have had several apprentices and currently have three apprentices with Poultec at present.
